- a) The vehicle population growth rate from Feb 2018 has been set at 0% per annum for Cat A, B and D, while that of Cat C will remain at 0.25% per annum. This will remain in place until 31 Jan 2028.
- b) LTA has identified the vehicles in the vehicle registry which will be redistributed. When the identified vehicles are deregistered, their quota will not be returned to the pool for bidding.
- c) From Feb 2023, the number of COEs available for bidding in each quarter is the rolling average of deregistrations in the previous four quarters.
- d) From May 2017, Cat E receives 10% of the deregistrations from Cat A, B and C.
- e) From May 2017, Cat D deregistrations no longer contribute to Cat E.
- f) From 6 Aug 2012, COEs for new taxi registrations are drawn from Cat E and are deducted from the total number of Cat E COEs, net of deregistrations in the same period. Adjustments are made every six months. Over the six-month period from 1 Jul 2025 to 31 Dec 2025, 410 taxis were registered and 595 taxis were deregistered. Therefore, a net addition of $(595 - 410 = 185)$ is made to the Cat E quota over the subsequent two quarters from Feb 2026 to Apr 2026 and May 2026 to Jul 2026.
- g) From May 2023, the deductions for ETS will be adjusted based on the rolling average of ETS registrations in the previous four quarters.
- h) Refers to Temporary COEs (TCOE) that were successfully secured by bidders but were not utilised during their validity period, which expired between Oct 2025 to Dec 2025. Expired Cat E TCOEs successfully secured by bidders but not utilised during their validity period, will be redistributed to Cat A, B and C in proportion to their respective contributions to Cat E.
- i) From 2nd bidding exercise of May 2023 (inclusive), guaranteed deregistrations of COEs which are due to expire in the next projected supply peak will be brought forward for redistribution. From Feb 2025, LTA will progressively inject up to about 20,000 additional COEs across vehicle categories over the next few years
